

HYGIENIC DOLAV BINS

DESIGNED FOR THE UNIQUE REQUIREMENTS OF THE MEAT INDUSTRY

1120H

ALTO 1400

1000 ACE

FOOD-FRIENDLY

Our plastic bins meet USDA standards and protect your meat from splinters, pests, pathogens, mold, or other undesirable elements commonly found in wood bins.

DESIGNED TO LAST & PROTECT

Smooth surfaces and rounded corners safeguard your meat from damage. Bins are maintenance-free and stand up to repeated power washing or steam cleaning, perfect for industries that demand hygienic standards.

COMPACT & STACKABLE

We've built efficiency into our designs. All bins are stackable and either nest or break down to store inside each other when not in use.

REUSABLE & RECYCLABLE

Bins are engineered from high-density polyethylene which is stable and durable. When their useful lives are over, they're 100% recyclable for zero waste to landfill.

HYGIENIC BINS FOR MEAT PROCESSING NEEDS

DOLAV 1000-ACE

The Dolav 1000 Ace bin is a one-piece, fixed-wall, solid wall bin with molded-in integrated runners. Engineered from impact-resistant, HDPE structural foam, these bins are durable, but lightweight, easy to clean, and designed for use in light and heavy meat processing environments.

Stocked in: ● ● ●

	Imperial	Metric
Length	47.24 in	1200 mm
Width	39.37 in	1000 mm
Height	29 in	740 mm
Volume	160 gal	605 L
Tare Weight	84 lbs	38.5 kg
Max Load	1,650 lbs	750 kg
Stack Load	11,000 lbs	5000 kg

DOLAV 1120H

The DOLAV 1120H bin is a one-piece, fixed-wall bin with molded-in integrated runners. Developed for the highest food safety standards in the world, the hygienic 1120H has no cavities or dirt traps. The 360 degrees of smooth design is ideal for a food processing environment that must be kept clean and sanitized.
